I am running against Pete Sessions for Congress in CD32.

We have taken a wrong turn, along a path that is increasingly destructive. It is time to stop and set out for the right one. Sessions had 16 years to work for policies that benefit all Americans. He failed.

It's time for our country to focus on improving economic prospects for all, educating everyone with the ability and desire to learn, and building an America that provides ever-increasing opportunities for our children and ourselves. I will bring these priorities to Congress.

Like what Sessions and the Republican Congress are doing?

Do nothing, and you can get more of the same.

Had enough – like I have? Go to walterhofheinz.org and find out more and contribute time, money and your endorsement. Your participation is essential.

You decide: Sessions – hired or fired?
